Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

K 351	Continued From page 2 During an interview at the time of the observations, the Director of Maintenance confirmed the sprinkler heads were not installed on the balconies and that the escutcheon caps were painted. NJAC 8:39-31.1(c), 31.2(e) NFPA 13, 25	K 351			
K 914 SS=F	Electrical Systems - Maintenance and Testing CFR(s): NFPA 101 Electrical Systems - Maintenance and Testing Hospital-grade receptacles at patient bed locations and where deep sedation or general anesthesia is administered, are tested after initial installation, replacement or servicing. Additional testing is performed at intervals defined by documented performance data. Receptacles not listed as hospital-grade at these locations are tested at intervals not exceeding 12 months. Line isolation monitors (LIM), if installed, are tested at intervals of less than or equal to 1 month by actuating the LIM test switch per 6.3.2.6.3.6, which activates both visual and audible alarm. For LIM circuits with automated self-testing, this manual test is performed at intervals less than or equal to 12 months. LIM circuits are tested per 6.3.3.3.2 after any repair or renovation to the electric distribution system. Records are maintained of required tests and associated repairs or modifications, containing date, room or area tested, and results. 6.3.4 (NFPA 99) This REQUIREMENT is not met as evidenced by: Based on document review and interview, the facility failed to ensure electrical outlet testing was conducted annually on the electrical system in	K 914	1. Facility immediately ensured electrical outlet testing was conducted on the electrical system. Inspection report	1/23/24
